SUMMARY

Full-stack developer with a background in law and leadership, experienced in building scalable web applications. Possess strong skills in project management and team leadership that help startups and tech companies drive agile development and innovation. Former CEO of Langino, where I led the creation of e-learning solutions. Now seeking to contribute my expertise and grow professionally.

TECHNICAL SKILLS

Python, Javascript, Typescript, SQL, React.js, HTML5, CSS3, Bootstrap, Materialize, Node.js, Express.js, PostgreSQL

TECHNICAL PROJECTS

StreakUp - Github | Demo
- **Developed** a motivation app using TypeScript and React, enabling users to build and reinforce positive habits.
- **Implemented** JWT authentication with an Express backend and PostgreSQL, ensuring secure user data management.
- **Automated** server operations using Node-Cron, improving efficiency and reducing manual intervention.

Kanban Task Manager - Github | Demo
- **Built** a Kanban task management system with React, providing an intuitive interface for organizing tasks.
- **Integrated** Redux Toolkit for state management, ensuring seamless data handling and performance.
- **Implemented** drag-and-drop functionality using React DnD Kit, enhancing user experience and task reordering efficiency.

EXPERIENCE

Software & Data Engineer — Tel Aviv, Israel
MRGN — 12/2024 – Present
- **Researched** business intelligence APIs and datasets, streamlining data acquisition for analytics.
- **Developed** web scraping scripts to extract and structure data from various sources, enhancing data availability.
- **Designed** and automated database management processes, improving data efficiency and reliability.

Co-Founder & Head of Development — Brno, Czechia
Langino, s.r.o. — 02/2019 – 10/2022
- **Led** a team of developers to build an e-learning platform using React, React Native, SQL, and JavaScript, delivering both web and mobile applications.
- **Managed** quality assurance processes for iOS, Android, and web apps, ensuring high performance and usability.
- **Implemented** Lean Startup and Scrum methodologies to streamline development and accelerate product iterations.
- **Launched** the app successfully, driving company growth and expanding market presence.
